Professional Summary

Final-year Computer Science undergraduate with a versatile skill set spanning Software Development and Data Analytics. Proven ability to build full-stack web applications and derive actionable business insights from complex datasets using SQL and Python. Passionate about solving real-world problems through technology and data-driven decision making.

Education

VIT Bhopal

Bachelor of Technology in Computer Science / CGPA: 8.58 / 10.00

Sep 2022 – May 2026

Madhya Pradesh

Technical Skills

- **Languages:** Python, Java, SQL, JavaScript, HTML, CSS, PHP.
- **Data Analytics:** Power BI, Tableau, Excel (Advanced), Pandas, NumPy, Matplotlib, Seaborn.
- **Frameworks & Tools:** RESTful APIs, Git/GitHub, VS Code, Scikit-learn.
- **Databases & Cloud:** MySQL, MongoDB, Linux, Cloud Computing Fundamentals.
- **Core Concepts:** Data Structures & Algorithms (DSA), OOPs, SDLC, Data Visualization.

Projects

GrowthEquity Stock Trading Web App | Product Lead & Full Stack Developer

Apr 2025

- Led a cross-functional team to develop a comprehensive stock trading platform using Agile methodologies.
- Designed and implemented RESTful APIs to handle user transactions and portfolio management, ensuring seamless frontend-backend integration.
- Delivered core features including real-time stock data visualization and user authentication, focusing on a responsive user experience.

Hotel Revenue Analytics | SQL, Excel, Power BI

Jul 2025

- Orchestrated an end-to-end data pipeline for hotel booking data, utilizing **SQL** for rigorous data cleaning and transformation.
- Quantified key revenue drivers by identifying a **10%** higher occupancy rate in premium rooms, directly informing strategic pricing models.
- Developed interactive **Power BI** dashboards to visualize occupancy trends and revenue metrics, providing stakeholders with actionable growth insights.

Cricket Performance Analytics | Python (Pandas/Matplotlib), SQL

Jul 2025

- Engineered an analytical framework using Python libraries (Pandas, Matplotlib) to perform Exploratory Data Analysis (EDA) on large-scale sports datasets.
- Optimized SQL queries for efficient data retrieval, significantly reducing execution time for complex aggregations.
- Visualized statistical performance trends to enable comparative analysis of player metrics across multiple seasons.

Activities

Technical Content Creator & Workshop Coordinator | AI Club, VIT Bhopal

Mar 2025

- Authored technical documentation and tutorials on AI/ML and LLM concepts, facilitating knowledge sharing within the student community.
- Organized workshops on Python and Data Science, increasing member engagement and practical skill application.

Certifications & Training

- SmartBridge Full Stack Developer (MERN) Apr 2025
- NPTEL Cloud Computing May 2024
- NPTEL Marketing Analytics May 2025
- MongoDB Associate Database Administrator May 2025
- HackerRank Python (Basic) Dec 2023
